Capability Statement

Core Competencies

Cooperative Agreement Management

We specialize in the full lifecycle of complex, multi-CIO Cooperative Agreements. Our work is grounded in a thorough understanding of Federal regulatory and financial management requirements and policies and laws. We provide steady, solutions-oriented management that addresses challenges and unanticipated events while keeping programs compliant, on track, and aligned with mission objectives.

Project Officer Expertise

As former CDC Project Officers, we are deeply experienced in designing and delivering technical assistance that is practical, timely, and actionable while managing complex portfolios under tight timelines and evolving guidance. Grounded in real-world CDC experience, our support brings clarity, consistency, and practical solutions that help programs run smoothly and recipients succeed.

Partner Engagement

We support partnership-building across the public health ecosystem, working with national partner organizations, academia, state, tribal, local, and territorial health departments, and the private sector. Our experience includes managing CDC-funded partners, facilitating dialogue, clarifying expectations, reviewing technical materials, and supporting dissemination and coordination efforts that align multi-stakeholder networks and advance collective impact.

Fiscal Management & Stewardship

We provide expert financial oversight for large public health portfolios, including budget development and markup, burn rate monitoring and trend analysis, risk identification and mitigation, and strategic spend-down planning. Our work has supported responsible stewardship of billions of dollars in Federal funding, ensuring funds are used effectively to advance public health goals.

Program Management

Our Federal-level Program Management experience ensures that projects align with strategic goals and contribute to long-term outcomes beyond the life of any single award. Capabilities include program benchmarking, process improvement, SOP development, budget planning, and coordination across CDC internal partners to strengthen governance, efficiency, and sustainability.
